Subject: looking for an importer in the UK

Dear Sir, Dear Madam,

Our cooperative GreenCotton supports 1,500 cotton farmers in a region in India with a long tradition of cotton cultivation.

We are committed to producing pesticide-free cotton, which means that women can work in the fields. In our workshops, spinning, dyeing and weaving are carried out in safe conditions. We have set up fair trade schemes to guarantee fair wages to farmers, who are thus not indebted and can let their children attend school. Thanks to crop rotation schemes, our industry uses up less water, making it possible to preserve biodiversity in the area.

You may wish to visit our site to find out more about traceability and our plans to reduce our carbon footprint: www.GreenCotton.in.

Your firm has been recommended to us and we would like to offer you the possibility to import our products for your production units. We are sure your customers would be interested in purchasing clothes made from ethical cotton.

If you are interested, please get in touch with us so that we can arrange a visit of our premises and farms.

We look forward to hearing from you soon.

Yours faithfully

Vikram Patel, Green Cotton Cooperative Marketing Manager
